## EDUCATIONAL DAY: "CLINICAL ASPECTS OF EVs ALREADY A REALITY?

### 22nd October (Tuesday)

<b>Clinical aspects of EVs. Already a reality?</b>	
8:30	<b>Registration</b> <i>Gaspar Melchor de Jovellanos Building's Hall.</i>
9:00	<b>Welcome and introduction</b> <i>Joana M. Ramis and Manuel Gómez-Florit, Health Research Institute of Balearic Islands (IdISBa), Research Institute of Health Sciences (IUNICS), University of Balearic Islands (UIB).</i>
9:30	<b>EVs as biomarkers in infectious diseases.</b> <i>Pilar Martín-Duque, Instituto de Salud Carlos III (ISCIII). Centro de Terapias Avanzadas, Instituto de Investigación Sanitaria de Aragón (IIS Aragón).</i>
10:00	<b>EVs as a source of biomarkers in neurological diseases.</b> <i>Rocío Pérez González, Instituto de Investigación Sanitaria y Biomédica de Alicante (ISABIAL).</i>
10:30	<b>From urinary EVs to <i>in vitro</i> diagnostics in chronic kidney disease: a long and (not finished) winding road.</b> <i>Francesc E. Borràs, Germans Trias i Pujol Research Institute (IGTP).</i>
11:00	<b>Coffee break</b>
11:30	<b>EVs for implant and surgery induced injury – start MoAning and get clinical.</b> <i>Mario Gimona, Head of Manufacturing GMP. Head of Research Program "Nanovesicular Therapies", Paracelsus Medical University Salzburg.</i>
12:00	<b>EVs as delivery agents.</b> <i>Lydia Alvarez-Erviti, Centro de Investigación Biomédica de La Rioja (CIBIR).</i>
12:30	<b>EVs as vaccines.</b> <i>Hernando del Portillo, Barcelona Institute for Global Health (ISGlobal), Germans Trias i Pujol Research Institute (IGTP).</i>
13:30	<b>Lunch</b>
15:00-16:00	<b>Identification and characterization of EVs by flow cytometry and NTA.</b> Coordinated by <i>Marcel·la Franquesa</i> and <i>Oscar Fornas</i> . Sponsor Short talks (10 minutes). <ul style="list-style-type: none"><li>○ <i>Norderlight-ESP</i> by <i>Cytek</i></li><li>○ <i>Symphony A1</i> by <i>Becton Dickinson</i></li><li>○ <i>Novocyte Penteon</i> by <i>Agilent</i></li><li>○ <i>Nanosight Pro Malvern</i> by <i>iesmat</i></li><li>○ <i>Viewsizer3000</i> by <i>Nane</i></li></ul>
16:00-18:30	<b>Novel technical approaches to single vesicle analysis. Practical Hands-on Sessions.</b> <i>Practical demos of the presented equipment in parallel.</i>
16:00-18:30	<b>Basic techniques Workshop.</b> Coordinated by <i>María Yáñez-Mó</i> and <i>Pilar Martín-Duque</i> . Each technique will be presented as a short video of the protocol in wetlab with discussion of details and analysis onsite. <ul style="list-style-type: none"><li>○ SP-IRIS/Exoview: Sample preparation, protocols and data processing. <i>Nerea Lago-Baameiro, Instituto de Investigación Sanitaria de Santiago de Compostela (IDIS).</i></li><li>○ Isolation of EVs from tissue samples. <i>Dra. Ana Talamillo, Center for Cooperative Research in Biosciences (CIC bioGUNE).</i></li><li>○ TEM negative staining and analysis with exosome analyser. <i>Joaquín Morales, Centro de Biología Molecular Severo Ochoa (CBMSO), Universidad Autónoma de Madrid (UAM).</i></li><li>○ EV uptake: drawbacks of different uptake methods. Protocols of maleimide staining and Renilla-carrying EVs. Data analysis. <i>Miguel Palma-Cobo, Centro de Biología Molecular Severo Ochoa (CBMSO), Universidad Autónoma de Madrid (UAM).</i></li><li>○ Immunocapture of EVs for Analysis by Flow Cytometry and ELISA. <i>Dra Carmen Campos-Silva, Universidad Loyola.</i></li><li>○ Mouse brain EV injection and visualization. Data analysis. <i>Aida de la Cruz-Gambrá, Achucarro Basque Center for Neuroscience y Universidad del País Vasco (UPV/EHU).</i></li></ul>

# GEIVEX 7<sup>TH</sup> INTERNATIONAL SYMPOSIUM

## 23rd October (Wednesday)

- 8:00 **Registration**  
Gaspar Melchor de Jovellanos Building's Hall.
- 8:45 **Welcome**  
Institutional welcome & welcome by the Local Organizing Committee.  
**Maria Yáñez-Mó**, GEIVEX president.  
Room: Gaspar Melchor de Jovellanos Building's Auditorium
- 9:00 **Opening lecture: The hidden microproteome as a source of novel exosome-secreted extracellular messengers.**  
**Maria Abad**, Principal Investigator at Altos Labs, Cambridge Institute of Science, Cambridge, UK, and at Vall d'Hebron Institute of Oncology (VHIO), Barcelona, Spain.  
Chair: Héctor Peinado, CNIO.
- 10:00 **GOLD SPONSOR: Extracellular vesicles: paving the way to automation, standardisation, and scale-up in precise isolation and single-particle characterisation.** Joshua Karam, IZON.
- 10:15 **GOLD SPONSOR: EXODUS, high-efficiency isolation of exosomes and its application in diagnosis and treatment.** Zoey Wang and Jiaqian Wang, EXODUS
- 10:30 Coffee break
- 11:00 **Session 1 – EVs in cancer.**  
Chairs: Mar Valés-Gómez, CNB-CSIC; Héctor Peinado, CNIO.
- Application of extracellular vesicles in 3d cell culture model of primary hepatocytes and liver tumoral cells. Silvia Lopez Sarrio, Center for Cooperative Research in Biosciences (CIC bioGUNE).
  - Depicting the adipose tissue secretome in the breast cancer microenvironment. Alejandro Pinedo Serrano, University of Castilla-La Mancha.
  - The role of extracellular vesicles glycosylation in tumour-adipose tissue communication. Cátia Ramos, University of Porto.
  - Exploring tumor derived extracellular vesicles from triple negative breast cancer tumor-on-a-chip and 3D models. María Fidel Lledó, Vall d'Hebron Institut de Recerca (VHIR).
  - EV-DNA: From cell survival to tumor progression. Enrique Bastón, Spanish National Cancer Research Center (CNIO).
  - Lemon-derived extracellular vesicles for targeted siRNA delivery in oncogene silencing. Sara Giancaterino, University of Bologna.
- 12:10 **GOLD SPONSOR: Make EVs as easy as cells: discover the NovoCyte flow cytometers.** Gabrielle Dammone, Field Application Scientist, Agilent United Kingdom.
- 12:25 **GOLD SPONSOR: Nanoimager: Life at the Nanoscale.** Laura Woythe, Field Application Scientist, ONI.
- 12:40 **Session 2 – EVs in neuro and other complex diseases.**  
Chairs: Jimena Baleriola Achucarro Basque Center for Neuroscience y Universidad del País Vasco UPV/EHU; Rocío Pérez González. Instituto de Investigación Sanitaria y Biomédica de Alicante (ISABIAL).
- Differential expression and interaction of Alzheimer's disease linked proteins in brain extracellular vesicles. María Mulet Fernández, University of Lleida (UdL).
- 13:15 Lunch
- 14:45 **Session 3 – Liquid biopsy and biomarkers.**  
Chairs: Pilar Martín-Duque, Instituto de Salud Carlos III; Gloria Alvarez-Llamas, IIS-Fundación Jiménez Díaz.
- Identification of extracellular vesicle surface signature in plasma from hypertensive patients and its association with albuminuria. Olga Martínez Arroyo, INCLIVA Biomedical Research Institute.
  - ExoGAG: The new era of human milk glycomics. María Pereira Hernández, Health Research Institute of Santiago de Compostela (IDIS).
  - Plasma exosomes from hypertensive and diabetic patients with renal dysfunction are enriched in redoximirs and fibromirs. Ana Flores Chova, INCLIVA Biomedical Research Institute.
  - A rapid and highly sensitive approach to the detection of extracellular vesicles. María Carmen Blanco-López, Universidad de Oviedo.
  - Proteomics of urinary extracellular vesicles highlight the involvement of vitronectin and the fibrinolytic pathway as mechanisms underlying renal fibrosis in kidney transplant patients. Marta Clos-Sansalvador, Germans Trias i Pujol Research Institute (IGTP).
  - Comprehensive proteomic analysis of porcine seminal extracellular vesicles identifies *in vivo* fertility biomarkers. Pablo Martínez-Díaz, University of Murcia (UMU).
  - MiRNAs from tear fluid-derived extracellular vesicles to identify patients at high-risk of fibrotic lesions after glaucoma surgery. Marta San Roque, Health Science Research Institute Germans Trias i Pujol (IGTP).
  - GLAST+ extracellular vesicles are decreased in people with primary progressive multiple sclerosis. Rocío del Carmen Bravo Miana, Biogipuzkoa Health Research Institute.
  - Extracellular vesicles identified as key mRNA carriers of ALK translocations in non-small cell lung cancer patients through optimized size exclusion chromatography. Beatriz Benayas, Centro de Biología Molecular Severo Ochoa (CBMSO), IIS-Princesa, Universidad Autónoma de Madrid (UAM).
- 16:20 **GOLD SPONSOR: State-of-the-art technologies for EV research: from pathological biomarkers discovery to therapeutic EV production.** Aitor González, Business Line Manager, Izasa Scientific
- 16:35 Coffee break
- 17:15 **Flash talks for Poster presentation.**  
Chair: María Yáñez-Mó, UAM.
- 18:45 **Poster Walk.**  
With Mallorcan finger food

## 24th October (Thursday)

### 9:15 Session 4 – Advances in EV methodology.

Chairs: María Pardo, Instituto de Investigación Sanitaria de Santiago de Compostela; Manuel Gómez-Florit, Research Institute on Health Sciences-IUNICS (UIB) IdISBa.  
Room: Gaspar Melchor de Jovellanos Building's Auditorium

- The corona of small extracellular vesicles from porcine seminal plasma has a protective effect against DNA oxidation. Jordi Ribas-Maynou, University of Murcia (UMU).
- Iron oxide nanoparticle-based labeling of MSC-EV: evaluating efficacy and purity for MRI imaging. Sergio Garcia, Health Science Research Institute Germans Trias i Pujol (IGTP).
- Pomegranate isolated-nanovesicles treatment relapses cutaneous inflammation: *in vivo* evidencies. Miquel Martínez-Navarrete, Universitat de València (UV).
- Study and validation of the metabolic signature of extracellular vesicles as a prognostic and predictive marker in pancreatic cancer. Pilar Espiau Romera, Instituto de Investigación Sanitaria Aragón (IIS Aragon).
- Prediction of potential plant extracellular vesicle markers by orthology search. Ibone Rubio, Universidad Autónoma de Madrid (UAM), Instituto de Investigación Sanitaria del Hospital Universitario La Paz.
- Sorting single EV through flow cytometry allows separation of antibody-labeled EV and downstream transcriptomic analysis. Marta Monguió-Tortajada, University of Lausanne (UNIL).

### 10:25 GOLD SPONSOR: CytoFLEX nano: new tool in Extracellular Vesicle analysis. Jorge Antonio Formaro, Beckman Coulter.

### 10:40 GOLD SPONSOR: Full Spectrum Flow Cytometry: A powerful technology to detect and isolate extracellular vesicles. Òscar Fornas, Cytek Biosciences.

### 10:55 Coffee break

### 11:30 Morning lecture: Antimicrobial peptides in helminth secretions – a gold mine for drug discovery?

Cinzia Cantacessi, Professor of Parasite Infection Biology, Department of Veterinary Medicine University of Cambridge, Cambridge, UK.  
Chair: Javier Sotillo Gallego, Centro Nacional de Microbiología.

### 12:30 Session 5 – EVs in infection and immunity.

Chairs: Carmen Fernández Becerra, ISGlobal, Barcelona Institute for Global Health, Hospital Clínic - Universitat de Barcelona; Rafael Prados, Universidad Autónoma de Madrid.

- Nanovesicles derived from frozen homogenized fasciola hepatica adults as an alternative source of extracellular vesicles for functional studies. Christian M. Sánchez López, Universitat de València (UV), IIS La Fe.
- Proteomic composition of extracellular vesicles derived from the interaction of *Trypanosoma cruzi* with myoblasts and intestinal cells. Marcel I. Ramirez, Universidade Federal do Paraná.

- Clathrin and caveolin mediated endocytosis define the extracellular entry during *G. intestinalis* and host cells interaction. Marcel I. Ramirez, Universidade Federal do Paraná.

### 13:05 GOLD SPONSOR: TBD. Presenter, Solmeglas/Particle Metrix.

### 13:20 Lunch

### 14:45 Afternoon lecture: Bringing new healthcare technologies to market: challenges and opportunities.

Roberto de la Rica, Principal Investigator at Multidisciplinary Sepsis Group; Health Research Institute of the Balearic Islands (IdISBa), Palma, Spain.  
Chair: Marta Monjo, Research Institute on Health Sciences-IUNICS (UIB), IdISBa.

### 15:45 Session 6 – Fundamental EVs biology.

Chairs: Juan Fafián-Labora, University of A Coruña (UDC), Interdisciplinary Center for Chemistry and Biology (CICA), INIBIC - University Hospital Complex A Coruña (CHUAC); Marcela Franquesa, Institut Germans Trias i Pujol (IGTP).

- Genome-wide-CRISPR/CAS9 screening identifies the commander recycling complex as a key player in EV cargo delivery. Miguel Palma Cobo, Instituto Universitario de Biología Molecular (IUBM), Universidad Autónoma de Madrid (UAM), Centro de Biología Molecular Severo Ochoa (CBMSO), IIS-IP.
- Looking for the missing links between small RNAs and mycobacterial EVs. José Luis Serrano Mestre, Universidad Autónoma de Madrid (UAM).
- Role of N-glycosylation on MSC-EV uptake in an *in vitro* model of TNF-stimulated endothelium: functional implications in cellular extravasation under dynamic flow conditions. Marta Clos, Germans Trias i Pujol Research Institute (IGTP).
- Superoxide dismutase and adenosine deaminase activity levels differ between porcine seminal extracellular vesicles subpopulations. Pablo Martínez Díaz, University of Murcia (UMU).
- Disrupt senescence through extracellular vesicles biogenesis reduction. Sergio Lucio Gallego, University of A Coruña (UDC).
- The circadian cargo of extracellular vesicles. Antonia Tomas Loba, University of Murcia (UMU).
- A KRas-hnRNP A2B1 axis regulates microRNA sorting into exosomes. Albert Lu, Universitat de Barcelona (UB), Institut d'Investigació Sanitària Albert Pi i Sunyer (IDIBAPS).

### 17:05 GOLD SPONSOR: Development of an automated workflow for purification of exosomes and exosomal RNA. Eric Vincent, Product Manager, Promega.

### 17:20 Coffee break

### 18:00 GEIVEX general assembly.

### 20:30 Symposium dinner (Optional). Restaurante Andana.

## 25th October (Friday)

9:15

### Session 7 – EV-Based therapy and translational medicine (I).

*Chairs: María Yáñez-Mó, UAM; Ibane Abasolo, Vall d'Hebron Research Institute (VHIR), Centro de Investigación Biomédica en Red, Bioingeniería, Biomateriales y Nanomedicina (CIBER-BBN). Room: Gaspar Melchor de Jovellanos Building's Auditorium*

- Extracellular vesicles from Treg obtained from human thymus suppress the proliferation of allogeneic lymphocytes. Marjorie Pion, *Gregorio Marañón Health Research Institute (IISGM)*.
- The most expressed miRNA from Treg-derived extracellular vesicles, from the human thymus, embedded in milk-derived EV, did not exhibit suppressive ability on primary human immune cells. Marjorie Pion, *Gregorio Marañón Health Research Institute (IISGM)*.
- Polymeric nanoparticles-loaded extracellular vesicles as biomimetic nucleic acid vaccines. Cristina Fornaguera Puigvert, *Institut Químic de Sarrià (IQS), Universitat Ramon Llull (URL)*.
- Design of glycolipid-functionalized extracellular vesicles for their selective targeting to dendritic cells. Jordi Guixeras Carreras, *Institut Químic de Sarrià (IQS), Universitat Ramon Llull (URL)*.
- Hyaluronic acid-based hydrogels for platelet-derived extracellular vesicles delivery in tendonopathy. Kristiyan Stiliyanov Atanasov, *Institut d'Investigació Sanitària Illes Balears (IdISBa)*.
- The journey of extracellular vesicles as trojan horses of therapeutic nanoparticles against cancer. María Sancho-Albero, *Instituto de Investigación Sanitaria de Aragón (IIS Aragón)*.

10:25

### GOLD SPONSOR: See what you sort, sort what you see: New sorter technology (Spectral FX and CellView) applied to small particle. Óscar Fornas, Becton Dickinson (BD).

10:40

### Coffee break

11:15

### Session 8 – EV Based therapy and translational medicine (II).

*Chairs: Lydia Alvarez Erviti, Center for Biomedical Research of La Rioja; Jose Antonio López-Guerrero, FIVO.*

- Enhancing pressure ulcer healing with platelet-derived extracellular vesicles: histological evaluation on an *in vivo* model. Andreu Miquel Amengual Tugores, *Universitat de les Illes Balears (UIB), Institut d'Investigació Sanitària Illes Balears (IdISBa)*.
- Effect of ocular surface extracellular vesicles on corneal wound healing. Laura García-Posadas, *Instituto Universitario de Oftalmobiología Aplicada (IOBA), Universidad de Valladolid (UVA)*.
- Cardiomyocytes-EVs improved COVID-19-derived cardiac damage and fibrosis. Marta Prieto-Vila, *Tokyo Medical University*.
- Curcumin-loaded milk-derived EVs: a natural approach for liver nanotherapy. Leyre Iturmendi, *Instituto de Investigación Sanitaria Gregorio Marañón (IISGM)*.

12:00

### Closing lecture: Extracellular vesicles for RNA delivery: from mechanistic insights to therapeutic applications.

*Pieter Vader, Associate Professor. CDL Research & Department of Experimental Cardiology. University Medical Center Utrecht. The Netherlands.*

*Chair: Joana María Ramis, Research Institute on Health Sciences-IUNICS (UIB) IdISBa*

13:00

### Closing remarks and awards.

OTHERS
